

# This is Epic.

The Best Keeps Getting Better.

 EPIC E1000 GX

# INTRODUCING THE EPIC E1000 GX

Featuring the Garmin GFC 700 Automated Flight Control System and the Hartzell 5-Blade Composite Swept-Tip Propeller. Delivering a More Epic E1000.

Priced at \$3.85M.

*Features, functionality, and performance benefits may be subject to change during the FAA certification process.*

## GARMIN GFC 700

**HIGH-END FEATURES. SIMPLE OPERATION. OUTSTANDING VALUE.**

The world-renowned Garmin GFC 700 is an advanced Attitude & Heading Reference System (AHRS)-based flight control system, providing flight director, autopilot, yaw damper, automatic and manual trim capabilities, emergency descent protection and more, all intended to inspire confidence and ensure safe, smooth flight operations.

Fully integrated with the Garmin G1000 NXi, the GFC 700 utilizes digital servos with brushless motors for better reliability and comfort, along with redundant self-monitoring technology to provide an extra margin of security, and lateral and vertical navigation for all phases of flight, including Takeoff and Go-Around (TOGA) modes, constant airspeed climbs and descents, and VNAV descent profiles.

# GO FASTER. GO FARTHER. GO EPIC.

## **GFC 700 ADVANCED SAFETY FEATURES INCLUDE:**

- Coupled Go Around
- Overspeed/Underspeed Protection
- Electronic Stability Protection (ESP)
- Emergency Descent Mode
- Automatic Level Mode

## **HARTZELL 5-BLADE COMPOSITE SWEPT-TIP PROPELLER**

**STRONGER STRUCTURAL DESIGN. IMPROVED AERODYNAMIC PERFORMANCE.**

The new Hartzell 5-blade propeller certainly offers impressive ramp appeal, but its striking good looks are just the beginning. The stronger, composite resin-injected blades allow for a thinner, wider airfoil that optimizes flight performance, offering

faster takeoff acceleration, improved climb and max cruise speeds, as well as quieter operations within and outside the cabin. Delivering enhanced speed, versatility and comfort.

**GX** More Speed.  
More Range.  
More Fun.
